

	Fuel, Emissions and Air Quality Policy	TPL08 Issue: 001 Date: 11/03/2021
---	---	--

Policy brief and purpose

K Rouse Civil Engineers Ltd fuel, emissions and air quality policy is in place to ensure that all employees comply with the recording of fuel, procedures and advice provided by the company and realise their individual impact on the environment.

Scope

All employees who drive company vehicles must follow the policy elements to ensure as a company, K Rouse Civil Engineers Ltd does all that's reasonably practical to reduce emissions and its overall impact on the environment.

Policy elements

- The transport department will set fuel KPIs and will continually monitor them.
- A full record of fuel use will be kept in a digital format that can be easily accessed.
- All fuel data will be checked regularly to identify trends or overuse.
- Employees will be briefed on fuel saving techniques wherever possible. (Refer to engine idling policy TPL02)
- Using knowledge and technology the company will continually strive to have a lesser impact on the environment.
- Employees will be briefed on the environment and their role to protect it.
- Employees will be encouraged to use FORS e-learning to broaden their knowledge on these subjects.
